

Smart Retirement Living

Access Health is the largest provider of communications in the Retirement Sector in Australia, leading and paving the way since 2004. Our latest in smart development solutions across the **ACSESS HEALTH FIBRE NETWORK** allows retirement operators and developers to simply expand their technology solutions effectively across our networks due to easy integration.

The network architecture and technology that is deployed ensure the resort is future proofed for years to come being backed, maintained and supported by the leaders in this field.

Did you know that with an Access Health Smart Network if you wish to at the beginning of the development allow residents to have ANY choice of Telecommunications Provider if you choose to implement our NBN backhaul model at a small additional cost to each villa.

Making it simple for residents:

If the Developer has chosen the NBN backhaul model allowing residents a choice of any telecommunications provider in Australia who service your development region; Access Health make it simple. New residents moving in will receive an active 30-Day Access Health complimentary service. If they choose to go with another telecommunications provider, they can do so knowing that when moving into their new resort villa they have complimentary internet and telephone in the interim. *Residents can now also bring their own telephone number with them.

Why Choose Access?

With over 40,000 services now connected, an Australian Based Call Centre, combined with our flexibility of technologies and understanding of the retirement industry we continue to be the preferred choice:

- ✓ Lendlease Retirement Communities
- ✓ VMCH – Villa Maria Catholic Homes – Aged Care & Retirement
- ✓ Arcare – Aged Care and Sencia Retirement Living
- ✓ Country Club Living
- ✓ And many other independent operators in Australia

With an Acsess Health Fibre Optic Network the adaptable add on solutions are endless ...

Security Comfort & Privacy

Each home can be equipped with a **Video Intercom Telephone Handset** enabling all entrance points within the retirement resort that is fitted with a Video Intercom Entrance Panel the capability to hear and see a visitor wanting to gain access. *An additional Cost Feature is residents being able to have an APP installed on their mobile device granting them the same functionality provided their device is connected to the mobile data network. Residents may always contact others via the video handsets within the village free of charge.

Residents may also via a **FOB KEY** easily swipe to gain access to entrance points whether they be electronically locked doors or gates that grant them access into the resort or featured facilities such as the club house, swimming pool, gymnasiums etc.

CCTV with state-of-the-art technology can discreetly be deployed including features such as number plate and facial recognition as options which can include such possibilities as easy entrance for registered vehicles through the retirement resorts secured gates for simple hassle free entry.

Free to Air TV

TV channels are included with the Acsess Health fibre optic network along with DAB Radio Channels giving residents the most comprehensive selection of TV and Audio Channels. The signals are received and sent to all residents' homes and common area TV points within the resort.

Foxtel Pay TV

Can be added to the network at the developers choice allowing residents to choose any FOXTEL package on offer by FOXTEL in the residential marketplace subscribing directly with FOXTEL.

Community Channel

Allows the resort operator to provide up to date information of happenings within the community and can be managed by a central head office via its remote publishing functions.

Electricity Monitoring and Solar Panel Control

Can easily be integrated by your 3rd Party into the Acsess Health network which ensures that no manual reading is required and also gives access to your electricity provider to control the solar network remotely.

State of the Art Emergency Call System

Legrand and Acsess Health have worked for 4 years bringing the latest innovation of medical alarm monitoring to the Retirement Sector. 4G & IP Emergency Call Alarm Units can be integrated into our network ensuring all alarm units are connected to the ACSESS HEALTH Data Network (residents do not need an Internet Subscription for this service). There is also a failsafe 4G SIM Card in the unit provided by your monitoring company of choice adding extra redundancy. This is a world first technology utilising SIP via ethernet and or GSM in the emergency call sector (SIP - Session Initiation Protocol which is a communications protocol for integrating multimedia communication sessions)

Smart Home Wi-Fi

All homes come with a Wi-Fi Hub allowing residents to connect smart devices and smart home devices. The Wi-Fi also holds a secondary hidden 2nd Network allowing 3rd party applications such as home automation provided by 3rd parties to utilise the network to function.

* Internal subscription required
